INSTRUCTIONS FOR AUTHORS

The Journal of Andaman Science Association (ISSN 0970-4183) is an official Journal of the Andaman Science Association, C/o. Central Island Agricultural Research Institute (CIARI), Port Blair - 744 101, Andaman and Nicobar Islands. Journal provides publications of articles in all areas of Agricultural Sciences, Horticultural Sciences and Forestry, Life Sciences, Environmental Sciences, Genetics, Molecular Biology, Biotechnology, Plant Pathology, Entomology, Biomedical Sciences, Botany and Plant Sciences, Soil Sciences, Zoology, Endocrinology, Toxicology Mycology and Parasitology, Microbiology, Cell Physiology, Environmental Biotechnology, Animal Sciences and Fisheries Sciences. The Journal welcomes the submission of manuscripts that meet the general criteria of significance and scientific excellence. Papers will be published shortly after acceptance. All articles are peer-reviewed.

File formats: Authors should submit their manuscripts in duplicate (Printed in A4 sheet) and electronic copy in CD. Submit the full manuscript including text, tables, figures (graphs and pictures) as a single file using Microsoft Word File for Rich Text Format (RTF), the font should be in Times New Roman.

First Page: The first page must include the following information, title of the manuscript and Author(s) address including email and telephone numbers.

Abstract: The abstract should describe the purpose of the study, major finding and conclusions. The abstracts should be limited to 250 words.

Keywords: 4- 6 keywords should be provided below the abstract.

Introduction: The introduction should be brief, the relevant literature on the subject, and the proposed approach or solution. It should be understandable to colleagues from a broad range of scientific disciplines.

Methodology: The methodology should be complete enough to allow experiments to be reproduced. However, only truly new procedures should be described in detail; previously published procedures should be cited, and important modifications of published procedures should be mentioned briefly. Capitalize trade names and include the manufacturer's name and address. Subheadings should be used. Methods in general use need not be described in detail.

Results: This section should include only results that are relevant to the aims and hypotheses summarized in the introduction. The results should be written in the past tense when describing findings in the authors' experiments. Previously published findings should be written in the present tense. Results should be explained, but largely without referring to the literature. Discussion, speculation and detailed interpretation of data should not be included in the Results but should be put into the Discussion section.

Discussion: This should interpret the findings in view of the results obtained in this and in past studies on this topic. State the conclusions in a few sentences at the end of the paper. The Results and Discussion sections can include subheadings, and when appropriate, both sections can be combined.

The **Acknowledgments** of people, grants, funds, etc. should be brief.

References: In the text, a reference identified by means of an author's name should be followed by the date of the reference in parentheses. When there are more than two authors, only the first author's name should be mentioned, followed by 'et al'. In the event that an author cited has had two or more works published during the same year, the reference, both in the text and in the reference list, should be identified by a lower case letter like 'a' and 'b' after the date to distinguish the works.

Format references

Book: Ludwig, J.A. & Reynolds, J.F. (1988). Statistical Ecology, A Premier on Methods and Computing. A Wiley-Interscience publication. 337 p.

Journal: Menon, A.G.K. & Talwar, P.K. (1972). Fishes of the Great Nicobar Expedition, 1966, with a description of a new gobioid fish of the family Kraemeriidae. *Records of Zoological Survey of India* 66(1-4): 35-61.

Book Chapter: Mohan, P.M., Dhivya, P., Subburaman, S. & Sachithanandam, V. (2012a). Status of the benthos and its environment in Jolly Buoy Island, Mahatma Gandhi Marine National Park, Andaman, India. pp. 23-48. In: Ecology of faunal communities on the Andaman and Nicobar Islands, (Eds.) Venkataraman, K., Raghunathan, C. and Sivaperuman, C., Springer, Heidelberg.

Proofs and Reprints: Electronic proofs will be sent (e-mail attachment) to the corresponding author as a PDF file. Page proofs are considered to be the final version of the manuscript. With the exception of typographical or minor clerical errors, no changes will be made in the manuscript at the proof stage. Because JASA will be published freely online to attract a wide audience), authors will have free electronic access to the full text (in both HTML and PDF) of the article. Authors can freely download the PDF file from which they can print unlimited copies of their articles.

Copyright: Submission of a manuscript implies: that the work described has not been published before (except in the form of an abstract or as part of a published lecture, or thesis) that it is not under consideration for publication elsewhere; that if and when the manuscript is accepted for publication, the authors agree to automatic transfer of the copyright to the publisher.

Fees and Charges: It is a prerequisite that one of the authors must be the member of the Andaman Science Association.

About Andaman Science Association (ASA)

Andaman and Nicobar Islands which are situated at Latitude 6°- 14° N and Longitude 92°-94° E, consists of 836 green emerald islands, islets and rocks. Almost all the islands are oriented in the north-south direction like an arc and stretch over a length of about 1912 km. Most of the islands are originated due to volcanic eruption in the sea, while few of them originated by coral reef formation. All the islands are biological and geological paradise having indigenous biota of flora & fauna and geological wonders which are yet to be unearthed. To conduct research in these small and fragile islands, there are several scientific organizations that have been doing focused research in different areas. However, there was no platform for them to present their research works which had local importance. Andaman Science Association (ASA) was established in 1984 at CARI, Port Blair with an objective to promote research and development in the unique Island ecosystem. Journal of the Andaman Science Association, published by ASA, is a unique journal that provides platform for those associated with tropical and island agriculture, horticulture, fisheries, animal science, oceanographic and marine biological studies, disaster management, issues related to science and technology, environment, forest etc. ASA intermittently organizes National and International seminars, conferences, knowledge sharing meets etc.

JOURNAL OF THE ANDAMAN SCIENCE ASSOCIATION
The Official Publication of the Andaman Science Association

Volume 27-2 July - December 2022

CONTENTS

Sl.No	Title and author	Page No
1	Additional records of macro-lepidoptera to the Andaman and Nicobar Islands <i>C. Sivaperuman and B. Sumit Kumar Rao</i>	121-126
2	New distributional records of spiders to Andaman and Nicobar Islands, India <i>C. Sivaperuman and Minakshi Dash</i>	127-131
3	Distribution, status and current trends in the population of Nicobar megapode in the Nicobar group of Islands <i>C. Sivaperuman, G. Gokulakrishnan and A.K. Das</i>	132-146
4	Leaf pigments and epicuticular wax content variation of selected mangrove species in Andaman Islands, India <i>Hari Nivas Asokan, Nikhil Lele, I. Jaisankar, B. Augustine Jerard and A. Velmurugan</i>	147-155
5	Distribution and diversity of gelatinous zooplankton from the coastal waters of South Andaman <i>Bhubanewari Panda and G. Padmavati</i>	156-167
6	Study on the biology of <i>Stolephorous commersonii</i> (Commerson's Anchovy) from Junglighat marine fish landing centre, South Andaman <i>Fahmeeda Parveen P.S., G. Padmavati, Venu S., Ameen U., Ramees P.V. and Limaangnen Pongener</i>	168-182
7	Epifaunal assemblages on morphologically distinct seaweeds of the intertidal zone, South Andaman <i>Parth Arora and G. Padmavati</i>	183-195
8	Anthropology vanishing tribal culture -a case of Great Andamanese tribe of Andaman Islands <i>Nilanjan Khatua</i>	196-203
9	Effect of drying methods on quality parameters of lemon grass (<i>Cymbopogon flexuosus</i>) Var. OD-19 <i>G. Devi Priyanka, Sohini Ghosh, R. Karthika Devi and Ajit Arun Waman</i>	204-209
10	A case study on the crop rotation in a disease hit coastal tide-fed shrimp pond with silver pompano, <i>Trachinotus blochii</i> (Lacepede, 1801) <i>Shoji Joseph, Imelda Joseph, Bobby Ignatius and Anuraj A</i>	210-215
11	Promising unique accession of arecanut (<i>Areca catechu</i>) <i>B. Augustine Jerard, V. Damodaran and I. Jaisankar</i>	216-221
12	Seminal plasma proteomics and its molecular changes associated with seasonality in male ostrich <i>C. Pandian and S.T Selvan</i>	222-227
13	Preliminary anatomical studies in <i>Garcinia dhanikhariensis</i> S.K.Srivastava. (Clusiaceae): an endemic species from Andaman Islands, India <i>R. Karthika Devi and S. Jayakumar</i>	228-234

- 14 Effect of NPK fertilizer levels on yields and yield economics, nutrient uptakes and post-harvest aspects of banana (*Musa* spp.) cultivars in coastal plain of western India 235-245
M.S. Navgare, S.L. Ghavale, B.R. Salvi, C.D. Pawar, V.G. Salvi and S.B. Thorat
- 15 Digital terrain modelling and soil erosion risk assessment for enhancing land productivity 246-255
Anwar M. and Kumar S.
- 16 Distribution and diversity of coastal birds with special emphasis on the foraging behaviour of *Tringa totanus* in Andaman and Nicobar Island 256-265
Falguni Mohanty and G. Padmavati
